Summary

Data professional with 6 months of experience in ETL pipeline development, cloud migration, and dashboard creation. Proficient in Python, SQL, Azure, Databricks (Spark), and Snowflake. Skilled at transforming raw data into actionable insights and building scalable data infrastructure.

Skills

Languages & Tools: Python (Pandas, NumPy, Scikit-Learn, TensorFlow), SQL, NoSQL

Data Engineering & Cloud: Azure, Databricks, Snowflake, ETL Pipeline, Data Warehousing, Data Modeling, DBA

Business Intelligence & Machine Learning: Power BI, Tableau, Machine Learning, Deep Learning, NLP

Experience

Data Analyst Intern

May 2023 – Nov 2023

Drone Destination

New Delhi

- Optimized data integrity by executing end-to-end data cleaning and statistical analysis using **Python (Pandas, NumPy)** and **SQL**, uncovering key operational insights for drone fleet management.
- Developed automated **ETL workflows** to extract and transform data from multiple telemetry sources, significantly improving data pipeline efficiency and processing speed.
- Designed and deployed interactive dashboards in **Power BI** and **Tableau**, providing stakeholders with real-time visibility into **KPIs** and operational metrics.

Artificial Intelligence Trainee

Jan 2023 – April 2023

Samsung Innovation Campus | NSIC

New Delhi

- Developed and refined machine learning models using **Scikit-Learn** and **TensorFlow**, focusing on improving accuracy and reliability for complex data predictions.
- Managed the full development process—from cleaning raw data to building final models—ensuring every project was backed by solid **Feature Engineering** and validation techniques.
- Designed specialized **Natural Language Processing (NLP)** tools to automatically categorize and analyze text, making unstructured information easier to use and understand.

Python Programming Trainee

April 2019 – June 2019

NSIC

New Delhi

- Completed a 2-month training focused on Python fundamentals, gaining a solid understanding of data structures, file handling, and basic scripting.
- Built simple Python programs, a **To-do List**, to practice using Python lists, loops, and handling user input.
- Worked with CSV files and the **Pandas** library to learn how to load, view, and filter tabular data in Python.

Projects

CloudMigrate360 — End-to-End Cloud Data Migration

- Architected a full data migration from on-premises **MS SQL Server** to **Azure SQL Database**, managing schema transformations and **ETL pipelines**.
- Optimized query performance post-migration and ensured data integrity across the cloud infrastructure.

Speech Emotion Recognition System using Deep Learning

- Developed a deep learning system to classify human emotions from speech using **CNNs** in **TensorFlow**.
- Applied feature extraction (**MFCC, Mel-spectrogram**) on audio **RAVDESS** dataset to achieve high classification accuracy.

Certifications & Coursework

Google Data Analytics Professional Certificate

IBM Data Engineering Professional Certificate

Hands On Essentials – Snowflake Data Warehouse

DP-900: Microsoft Azure Data Fundamentals

Education

Post Graduate Diploma in Business Analytics

2024 – 2025

Aligarh Muslim University | CGPA: 7.3 / 10.0

Aligarh, India

Bachelor of Technology in Electronics and Communication Engineering

2020 – 2023

Jamia Hamdard University | CGPA: 7.9 / 10.0

New Delhi, India
