Nasir Khan

992-7387-864 | alignasirkhan@gmail.com | linkedin.com/in/alignasirkhan | github.com/alignasirkhan | Portfolio

Summary

Data professional with 6 months of experience in ETL pipeline development, cloud migration, and dashboard creation. Proficient in Python, SQL, Azure, Databricks (Spark), and Snowflake Datawarehouse. Skilled at transforming raw data into actionable insights and building scalable data infrastructure.

Skills

Languages & Tools: Python (Pandas, NumPy, Scikit-Learn, TensorFlow), SQL, Docker
Databases: PostgreSQL, MySQL, Microsoft SQL Server
Data Engineering & Cloud: Azure, Databricks, Snowflake, ETL Pipeline, Data Warehousing, Data Modelling, Database Administration
Business Intelligence: Microsoft Excel, Power BI, Tableau, Grafana

Experience

Data Analyst Intern **May 2023 – Nov 2023**
Drone Destination *New Delhi*

- Performed end-to-end data cleaning and statistical analysis using **Python (Pandas, NumPy)** and **SQL**, improving data integrity and identifying operational insights for drone fleet management.
- Developed automated **ETL workflows** to extract and transform data from multiple telemetry sources, improving pipeline efficiency and processing speed.
- Built interactive **Power BI** dashboards, providing stakeholders with real-time visibility into **KPIs** and operational metrics.

Artificial Intelligence Trainee **Jan 2023 – April 2023**
Samsung Innovation Campus *New Delhi*

- Developed machine learning models using **Scikit-Learn** and **TensorFlow** for complex data prediction and analysis.
- Performed data cleaning, **Feature Engineering**, model development, and validation to improve model reliability.
- Developed **Natural Language Processing (NLP)** solutions to categorize and analyze unstructured text data.

Projects

Real-Time Air Quality Index (AQI) Tracking & Analytics Platform

- Built an end-to-end **real-time data pipeline** using **Python, Open-Meteo API, Azure Event Hubs, Databricks, Delta Lake, and Grafana** for multi-city air quality monitoring.
- Implemented a **Bronze–Silver–Gold Medallion Architecture** with Unity Catalog for ingestion, validation, deduplication, transformation, and analytics.
- Developed automated **Databricks Serverless Jobs** using Structured Streaming and Delta Lake checkpoints for incremental Silver and Gold processing.
- Designed a **star-schema analytics layer** and Grafana Cloud dashboard for AQI trends, PM2.5, PM10, city comparisons, and AQI category analysis.

WeatherLake Data Analytics Platform

- Built an end-to-end weather ETL data pipeline using **Python, Apache Airflow, Open-Meteo API, Docker, PostgreSQL, and Power BI**.
- Designed a **Medallion Architecture**-based pipeline for automated ingestion, transformation, quality checks, and analytics using Apache Airflow.
- Processed **6+ million historical weather records** across **100+ major Indian cities** covering **2020–2026**, including key weather metrics.
- Developed an interactive **Power BI dashboard** for weather trends, city comparisons, historical analysis, and key weather KPIs.

CloudMigrate360 — End-to-End Cloud Data Migration

- Architected a full migration from on-premises **MS SQL Server** to **Azure SQL Database**, managing schema transformations and **ETL pipelines**.
- Optimized post-migration query performance and ensured data integrity across the cloud infrastructure.

Certifications & Coursework

Google Data Analytics
Hands On Essentials – Snowflake Data Warehouse
IBM Data Engineering
Microsoft Azure Data Fundamentals: DP-900

Education

Post Graduate Diploma in Business Analytics **2024 – 2025**
Aligarh Muslim University | ***CGPA: 7.3 / 10.0*** *Aligarh, India*

Bachelor of Technology in Electronics and Communication Engineering **2020 – 2023**
Jamia Hamdard University | ***CGPA: 7.8 / 10.0*** *New Delhi, India*
